Notice
Please do not remove any labels on this graphics card. Doing so may void the warranty of this card.
Due to rapid change in technology, some of the specifications might be out of date before publication of this this
manual. The author assumes no responsibility for any errors or omissions that may appear in this document nor does
the author make a commitment to update the information contained herein.

Rovi Product Notice:
This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual
property rights. Use of this copyright protection technology must be authorized by Rovi Corporation, and is intended
for home and other limited viewing uses only unless otherwise authorized by Rovi Corporation. Reverse engineering
or disassembly is prohibited.

1. Introduction

1.1. Minimum System Requirements

- **Hardware**
  - Intel® Pentium® 4 or AMD Athlon™ XP class
  - 2GB system memory (4GB recommended)
  - Optical drive for software installation (CD-ROM or DVD-ROM drive)

- **Operating System**
  - Windows® 7
  - Windows® Vista
  - Windows® XP
Expansion cards contain very delicate Integrated Circuit (IC) chips. To protect them against damage from static electricity, you should follow some precautions whenever you work on your computer.

1. Turn off your computer and unplug power supply.
2. Use a grounded wrist strap before handling computer components. If you do not have one, touch both of your hands to a safely grounded object or to a metal object, such as the power supply case.
3. Place components on a grounded antistatic pad or on the bag that came with the components whenever the components are separated from the system.

The card contains sensitive electric components, which can be easily damaged by static electricity, so the card should be left in its original packing until it is installed. Unpacking and installation should be done on a grounded anti-static mat. The operator should be wearing an anti-static wristband, grounded at the same point as the anti-static mat.

Inspect the card carton for obvious damage. Shipping and handling may cause damage to your card. Be sure there are no shipping and handling damages on the card before proceeding.

⚠️ DO NOT APPLY POWER TO YOUR SYSTEM IF THE GRAPHICS CARD IS DAMAGED.

⚠️ In order to ensure that your graphics card can work correctly, please use official GIGABYTE BIOS only. Using non-official GIGABYTE BIOS might cause problem(s) on the graphics card.
2.1. Hardware Installation

Now that you have prepared your computer, you are ready to install your graphics card.

Step 1.
Locate the PCI Express x16 slot. If necessary, remove the metal cover from this slot; then align your graphics card with the PCI Express x16 slot, and press it in firmly until the card is fully seated.

Make sure that the gold edge connector of the graphics card is securely inserted.

Step 2.
Replace the screw to fasten the card in place, and replace the computer cover.

Step 3.
Connect the appropriate cable to the card and the display.

How NVIDIA® SLI™ (Scalable Link Interface) technology works:

If you are planning on using this graphics card as part of an SLI system, the following are required:
- An SLI certified motherboard with two/three PCIe x16 slots and correct chipset driver
- An SLI bridge connector or 3-way SLI bridge connector

In an SLI configuration, two/three SLI-ready graphics cards of the same model and the same manufacturers are connected together via SLI bridge connector in a system that provides two/three x16 PCI Express slots to scale graphics performance. The picture below shows that two and three graphics cards are linked in parallel in an SLI configuration.

**SLI Configuration:**

![SLI Configuration Diagram]

**3-Way SLI Configuration:**

![3-Way SLI Configuration Diagram]
3. Software Installation

Notice the following guidelines before installing the drivers:

1. First make sure your system has installed DirectX 9 or later version.
2. Make sure your system has installed the appropriate motherboard drivers (for the motherboard drivers, please contact the motherboard manufacturer.)

3.1. Driver and Utility Installation
3.1.1. Driver Installation

After installing the operating system, insert the driver disk into your optical drive. The driver Autorun screen is automatically displayed which looks like that shown in the screen shot below. (If the driver Autorun screen does not appear automatically, go to My Computer, double-click the optical drive and execute the setup.exe program.)

Step 1:
Click the Install Display Driver item.

Step 2:
Click the AGREE AND CONTINUE button.

For software MPEG support in Windows XP, you must install DirectX first. Users who run Windows XP with Service Pack 2 or above do not need to install DirectX separately.
Step 3:
Check the Express then click the NEXT button.

Step 4:
Check the Install NVIDIA Update then click the NEXT button.

The system is installing the components.

Step 5:
Click the RESTART NOW button to restart the computer. Then the driver installation is completed.
3.1.2. GIGABYTE Easy Boost on Driver Disk

Step 1:
Click the GIGABYTE Easy Boost item.

Step 2:
Choose the language for the installation and click the OK button.

Step 3:
Choose the Typical and click the Next button.

Step 4:
Click the Finish button. Then the installation of the GIGABYTE Easy Boost is completed.

The system is installing the components.
GIGABYTE Easy Boost
Easy Boost is a graphics card smart tuning tool, combined with Overclock, OSD Turning, BIOS Setting, Technical Support, Live Update function.

Over Clock: User can adjust GPU clock, Memory clock, Shader clock and Fan speed here. User can also monitor graphics card current parameters.

OSD Turning: User can set hotkey of On-Screen-Display and path of screen shot and recording video savings at “OSD” page. User can also adjust Gamma, Contrast and Brightness at “Color” page.
BIOS Setting:
User can back up current BIOS, flash BIOS from selected file and auto flash BIOS on-line.

Technical Support: User can get information of VGA, CPU, motherboard, system memory and monitor. User also can press “Export” button to export all system information into .txt file.

Live Update: Easy Boost will auto detect the latest version Easy Boost on-line and auto update.

**CAUTION**  Incorrectly doing overclock/overvoltage may result in damage to your system and reduce the useful life of the system components.
3.2. Display Properties Pages

Display Settings (Resolutions and Color Quality for Windows)

To access Display Settings page, right-click on desktop and select Personalize, then the Personalization windows will show up. Select Display Settings to adjust the screen resolution and color quality settings.

You can move the slider to change the resolution.

You can click the item to change the color quality.

Click the Advanced button for advanced settings.
3.3. Accessing NVIDIA Control Panel

After installation of the display driver, right-click on the desktop and select **NVIDIA Control Panel**. The **NVIDIA Control Panel** is used to configure all your graphics card settings.

Right-click on the desktop and select **NVIDIA Control Panel**.

In the NVIDIA Control Panel, select a category to alter specific NVIDIA display settings.
- 3D settings
- Display
- Stereoscopic 3D
- Video
3D Settings

Tasks in the 3D Settings pages allow you to do the following:

- Change the image and rendering settings of your 3D applications and games that utilize Direct3D and OpenGL technology.
- Override the shipped clocked frequencies of your GPU and GPU memory to increase your GPU performance.
- Assign specific 3D settings to a game so that these settings automatically load when a game is launched.

- **Adjust Image Settings with Preview**
  If you are unfamiliar with 3D technology or not an advanced graphics user, use the Adjust Image Settings with Preview page to preview any changes you make for improved image quality and rendering.

- **Manage 3D Settings**
  The Manage 3D Settings page enables you to establish default 3D settings to use for all your Direct3D or OpenGL applications and to establish a unique set of 3D settings for a particular game or application.

- **Set PhysX configuration**
  NVIDIA® PhysX® is a powerful physics engine that can utilize GPU acceleration to provide amazing real-time physics effects.
Display

A variety of display features enable you to further manipulate and configure your display settings to optimize the use of your displays. Tasks in the Display pages allow you to do the following:

• Move CRT screen position
• Change resolution
• Adjust desktop color settings
• Rotate display
• Manage custom resolutions
• Set up multiple displays

Change Resolution

Using the Change Resolution controls, you can change the color setting, reduce screen flickering, or adjust the amount of information appearing on your display.
- Adjust Desktop Color Settings
  Use this page to set the contrast, sharpness, and color depth (Digital Vibrance) of the images on your desktop. These changes will not affect any video playback. To change video color settings, go to Adjust Video Color Settings under the Video and TV section from the Start page.

- Rotate Display
  The NVIDIA Rotate features enable you to change the orientation of your desktop to portrait, landscape, and inverted modes. This is useful if you have rotated your physical display and need to rotate the desktop to match the orientation of your display.

- View HDCP status
  Use this page to check if your system is HDCP-capable.
Adjust Desktop Size and Position
You can adjust desktop size and position for your displays.

Set Up Multiple Displays
NVIDIA nView technology enables you to view your desktop in one of several multi-display modes to make the best use of the displays (monitors) that are connected to your computer.

Dual-Monitor Setup
You can set the display to output from two monitors on the Set Up Multiple Displays page.

Select your preferred nView display modes here.
- Only use one display (Single)
- The same on both display (Clone)
- Configured independently from each other (Dualview)
- As one large horizontal desktop (Horizontal span)
- As one large vertical desktop (Vertical span)
(1) The same on both display (Clone)
Clone mode indicates that both displays in the display pair show images of the same desktop.

(2) Configured independently from each other (Dualview)
Dualview mode indicates that both displays in the display pair function as one virtual desktop. Unlike Horizontal Span or Vertical Span mode, Dualview treats each display as a separate device. This means that the taskbar will not be stretched across displays and 3D applications are not accelerated as efficiently as when the application spans displays.

(3) As one large horizontal desktop (Horizontal span)
Horizontal Span mode indicates that both displays in the display pair function as one wide virtual desktop. The width of each display is half the width of the total virtual desktop width.

(4) As one large vertical desktop (Vertical span)
Vertical Span mode indicates that both displays in the display pair function as one tall virtual desktop. The height of each display is half the height of the total virtual desktop height.
Stereoscopic 3D
Tasks in the Stereoscopic 3D pages allow you to do the following:

- Set up stereoscopic 3D
- View compatibility with games

■ Set Up Stereoscopic 3D
You can enable stereoscopic 3D, set depth, and set your 3D displays and 3D glasses. (To enable stereoscopic 3D function, you will need 3D displays and glasses. The details: http://www.nvidia.com/object/3d-vision-main.html)

■ View Compatibility With Games
You can view stereoscopic 3D compatibility with games.
Video & Television

Video and television features are similar to those for analog for optimal viewing. Tasks in the Video & Television pages allow you to do the following:

- Adjust your television picture quality and video color settings for the best possible viewing in its environment.
- Change the position and size of the desktop video to best fit your television screen.

■ Adjust Video Color Settings

Use the controls on this page to fine tune the color settings for video content on your display. Select one of the test images to monitor your changes. For best results, play a video while you make adjustment to view the changes as they happen.

■ Adjust Video Image Settings

Use the controls on this page to fine tune the image settings for video content on your display. You can choose to use inverse telecine, adjust edge sharpness, or apply noise filtering. For best results, play a video while you make adjustment to view the changes as they happen.

Note:
Support for some features under Windows Vista is in development and may not be available with your ForceWare graphics driver version. Consult the release notes for updated information on supported features.
4. Troubleshooting Tips

The following troubleshooting tips may help if you experience problems. Contact your dealer or GIGABYTE for more advanced troubleshooting information.

- Check that the card is seated properly in the PCI Express x16 slot.
- Ensure that the display cable is securely fastened to the card's display connector.
- Make sure that the monitor and computer are plugged in and receiving power.
- If necessary, disable any built-in graphics capabilities on your motherboard. For more information, consult your computer’s manual or manufacturer. (NOTE: Some manufacturers do not allow the built-in graphics to be disabled or to become the secondary display.)
- Make sure you selected the appropriate display device and graphics card when you install the graphics driver.
- Restart your computer.
  Press <F8> on your keyboard after system starts up. When the Windows Advanced Options Menu appears, select Safe Mode and press <Enter>. After getting into Safe Mode, in Device Manager check whether the driver for the graphics card is correct.
- For more assistance, use the Troubleshooting Guide located in the Windows Help or contact your computer manufacturer.
- If you are not able to find the desired monitor color/resolution settings:
  The color and screen resolution options available for selection depend on the graphics card being installed.

If necessary, adjust your monitor’s setting using monitor's adjust panel to make the screen look focused, crisp, and sharp. (Please refer to the monitor's manual.)
5.1. Regulatory Statements

Regulatory Notices
This document must not be copied without our written permission, and the contents there of must not be imparted to a third party nor be used for any unauthorized purpose. Contravention will be prosecuted. We believe that the information contained herein was accurate in all respects at the time of printing. GIGABYTE cannot, however, assume any responsibility for errors or omissions in this text. Also note that the information in this document is subject to change without notice and should not be construed as a commitment by GIGABYTE.

Our Commitment to Preserving the Environment
In addition to high-efficiency performance, all GIGABYTE motherboards fulfill European Union regulations for RoHS (Restriction of Certain Hazardous Substances in Electrical and Electronic Equipment) and WEEE (Waste Electrical and Electronic Equipment) environmental directives, as well as most major worldwide safety requirements. To prevent releases of harmful substances into the environment and to maximize the use of our natural resources, GIGABYTE provides the following information on how you can responsibly recycle or reuse most of the materials in your "end of life" product.

Restriction of Hazardous Substances (RoHS) Directive Statement
GIGABYTE products have not intended to add and safe from hazardous substances (Cd, Pb, Hg, Cr+6, PBDE and PBB). The parts and components have been carefully selected to meet RoHS requirement. Moreover, we at GIGABYTE are continuing our efforts to develop products that do not use internationally banned toxic chemicals.

Waste Electrical & Electronic Equipment (WEEE) Directive Statement
GIGABYTE will fulfill the national laws as interpreted from the 2002/96/EC WEEE (Waste Electrical and Electronic Equipment) directive. The WEEE Directive specifies the treatment, collection, recycling and disposal of electric and electronic devices and their components. Under the Directive, used equipment must be marked, collected separately, and disposed of properly.

WEEE Symbol Statement
The symbol shown below is on the product or on its packaging, which indicates that this product must not be disposed of with other waste. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.

The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local government office, your household waste disposal service or where you purchased the product for details of environmentally safe recycling.

• When your electrical or electronic equipment is no longer useful to you, “take it back” to your local or regional waste collection administration for recycling.

• If you need further assistance in recycling, reusing in your "end of life" product, you may contact us at the Customer Care number listed in your product’s user’s manual and we will be glad to help you with your effort.
Finally, we suggest that you practice other environmentally friendly actions by understanding and using the energy-saving features of this product (where applicable), recycling the inner and outer packaging (including shipping containers) this product was delivered in, and by disposing of or recycling used batteries properly. With your help, we can reduce the amount of natural resources needed to produce electrical and electronic equipment, minimize the use of landfills for the disposal of "end of life" products, and generally improve our quality of life by ensuring that potentially hazardous substances are not released into the environment and are disposed of properly.

**China Restriction of Hazardous Substances Table**

The following table is supplied in compliance with China's Restriction of Hazardous Substances (China RoHS) requirements:

<table>
